S P SETIA AND GENTARI TO EXPLORE GREEN MOBILITY COLLABORATION ACROSS SETIA DEVELOPMENTS

SHAH ALAM – S P Setia Berhad ("Setia") and clean energy solutions company Gentari through its subsidiary Gentari Green Mobility Sdn Bhd have signed a Memorandum of Understanding ("MoU") to explore a strategic collaboration in clean energy and green mobility solutions, including the potential deployment of electric vehicle ("EV") charging facilities at selected Setia developments.

Under the MoU, the parties will discuss opportunities relating to the identification, feasibility assessment, installation, operation and maintenance of EV charging facilities at identified Setia sites.

The collaboration also contemplates joint efforts to promote EV adoption, improve visibility and access to EV charging infrastructure, and explore future business collaboration in clean energy and green mobility solutions across the Setia group.

Setia President and Chief Executive Officer Datuk Zaini Yusoff said the MoU reflects Setia's continued focus on creating sustainable communities and enriching lifestyles across its residential, commercial and integrated township developments.

"As a leading township and community developer, Setia has a responsibility to shape future-ready environments that enable more sustainable, connected and liveable lifestyles. Making EV charging more accessible within our townships is a practical step towards accelerating the shift to greener mobility, helping reduce reliance on petrol, lower vehicle emissions and support Malaysia's transition towards a lower-carbon future. It also strengthens the value proposition of our existing developments by enhancing everyday convenience, amenities and liveability for the communities that already call Setia home."

"Through our collaboration with Gentari, we aim to turn sustainability ambitions into practical solutions that create lasting value for our residents and developments, while reinforcing Setia's position as a progressive developer building resilient communities for the future," said Datuk Zaini Yusoff.

Echoing Setia's commitment to sustainable communities, Fadzrul Ahmad, Gentari's Chief Green Mobility Officer said the collaboration reflects a shared intent to make EV charging more accessible, practical and part of everyday life.

"At Gentari, we are committed to being a trusted green mobility ecosystem partner, delivering accessible and high-performance EV charging at scale. Through our collaboration with Setia, we are exploring how charging infrastructure can be integrated into thriving communities across Setia's townships and developments, making EV adoption more practical and convenient for residents and visitors while supporting Malaysia's transition towards a lower-carbon future."

Gentari, wholly owned by PETRONAS, is a clean energy solutions company operating across Renewable Energy, Hydrogen and Green Mobility. Through its portfolio of renewables, low-carbon fuels and mobility offerings, Gentari supports customers in addressing evolving energy needs while balancing energy security, reliability and affordability. With a growing presence across Asia Pacific, Gentari works with governments, businesses and communities to develop and deploy energy solutions that support economic development and energy transition priorities across the region. By combining expertise across its businesses, Gentari helps customers optimise energy systems, strengthen operational resilience and create long-term value. Gentari aims to be Asia Pacific's most valued clean energy solutions partner.
